

Review the implementation, end to end.

Follow a diagram into its manifest, contract, service, and evidence. Each relationship is explicit and reviewable.

Parsed manifest data; source fingerprints checked

Declared package dependencies

An arrow points from an imported DAR to the package that declares it in data-dependencies. This graph is parsed from current daml.yaml files; it is not a runtime call graph.

DAML PACKAGE · 0.1.0

harmonia-interfaces

product/ledger/interfaces/daml.yaml
declares 0 DAR imports. Standard
dependencies: daml-prim, daml-stdlib.

product/ledger/interfaces/daml.yaml

Original proposal · lines 53–74

What to challenge

The reusable core supports decisions and joins. The live composer currently exposes bounded sequential plans.
